

TEXAS A&M AGRILIFE RESEARCH

About

Texas A&M AgriLife Research is Texas' premier agricultural, natural resources and life sciences research agency. AgriLife Research touches all aspects of agriculture and life sciences research in collaboration with other state agencies, universities, government organizations and industry groups. The agency delivers life-sustaining, industry-changing research impacts to Texans and throughout the world.

Our research focuses on four interconnected key areas of impact:

- Scientific discovery and emerging technologies.
- Environmental and economic sustainability.
- Health and wellness across the spectrum of living things.
- Farms, ranches and fisheries.

+\$126M

research funding awarded in 2021

+\$223.5M

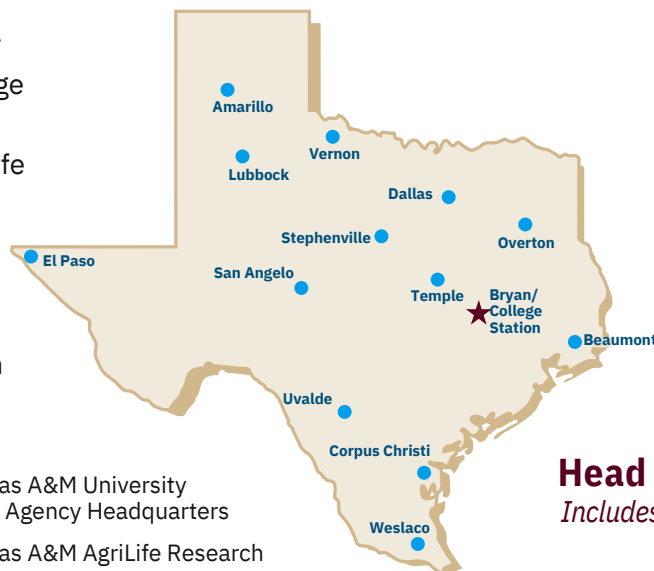

research expenditures for FY21

+\$2.4M

royalties from intellectual property in FY21

Locations

Our thirteen research centers are strategically located to take advantage of Texas' full climatic diversity, to equip AgriLife Research scientists to collaborate with institutions practically anywhere in the world and to conduct research with global impact.
